

SRT range

Polyester pumping stations

Designed for **communities**

**The No-corrosion
choice**

Rain water and waste water

The **SRT** station is perfectly suited for water pumping for any community such as:

- Industry,
- Town,
- Subdivision,
- Camp site,
- Supermarket, etc...

Volume pumped: **5 to 300 m³/h.**

The Range consists of

8 tank cross-sections:

1 • 1,2 • 1,4 • 1,6 • 1,8 • 2 • 2,4 et 2,9 m.

For a height of **1 to 8 m.**

SRT pumping station adjustment is precise to the centimetre to facilitate installation.

All our stations comply with the regulatory requirements of **NF EN 12050** and are covered by a compliance certificate of the basic type (Test Report) granted by an authorized agency (CSTB). They can thus carry the **CE** mark.
